Team Contract

Project Team Name: Hudders Hub

	Team Member Name	Email	Phone
1	Anish Tandukar	tanish23@tbc.edu.np	9761722345
2	Kanchana Pasachhe	pkanchana23@tbc.edu.np	9841171896
3	Dipsan Thapa	tdipsan24@tbc.edu.np	9815085801
4	Sujal Khorja	ksujal24@tbc.edu.np	9849932717
5	Drishya Bikram Pahari	pdrishya23@tbc.edu.np	9824423334
6	Vickky Bajaj Shah	svickky24@tbc.edu.np	9817548619

A. Team Structure:

1. Leadership structure *(individual, individual with rotating leadership, shared)*:

The leadership structure will follow an individual leadership model, where Anish will serve as the team leader for the entire duration of the project. The team leader will be responsible for guiding the team and making sure that the progress of the project is smooth.

The team leader will make plans and organize tasks, set clear deadlines and assign work to the members based on their strengths and abilities. The leader will monitor the progress of tasks and make sure that the deadlines are met.

Moreover, the team leader will keep the team organized, maintain coordination among the members, organize meetings and address issues that may arise during the project. The leader will also encourage the members, so they feel responsible, motivated and actively involved in the project.

2. Decision-making policy *(by consensus? by majority vote?)*:

First of all, the decision will be made through proper discussion among team members where everyone is free to share their opinions and ideas. This ensures that all members have the opportunity to contribute and look for different perspectives before reaching a decision.

The team will primarily follow a consensus-based decision-making approach, where everyone's approval is needed to finalize a decision. However, If the team cannot come to a conclusion then the decision will be made through majority vote. Each member will vote and the option that receives the highest number of votes will be accepted as the final decision. Since the team consists of six members, a minimum of four out of six votes will be required for the decision to be in favour.

3. Who is the team Recorder/Documentation Manager/Maintainer of team activity?

Team Recorder: Drishya, Sujal

Drishya and Sujal are responsible for recording key points, discussions, decisions and progress made during team meetings. They make sure that all important information is properly written and shared when it is required.

Documentation Managers: Kanchana, Dipsan

Kanchana and Dipsan are responsible for preparing, organizing and maintaining all project-related documents. They work on updating reports, maintaining records of project progress. They also make sure that the documentation is clear, accurate and properly structured.

Maintainer of team: Anish, Vickky

Anish and Vickky are responsible for checking and looking after overall team coordination and maintaining smooth workflow within the group. They help the team to keep track of tasks to progress according to the plan. They need to assist team members in need and help the team to keep track of project goals.

4. Day, time, and place for regular team meetings:

Online Meeting:

Day: Wednesday, Thursday, Friday (Flexible)

Time: 5 pm to 7 pm (Flexible)

Google Meet Link : https://meet.google.com/hif-ppyq-vrv

Physical Meeting:

Day: Tuesday, Wednesday, Thursday (Flexible)

Time: 9 am to 11 am (Flexible)

Venue: The British College, A1/D18

5. Usual method of communication

The main source of communication within the team is Discord, where members discuss project-related matters and help each other with tasks. Important notes and useful materials are shared in #notes-resources channel so that all team members can use them when needed.

Discord Link: https://discord.gg/cmqgfNfG

Channels:

#notes-resources : Channel where team members share their ideas, notes and supporting materials.

#polls : Channel where team members vote in case the consensus approach fails.

#meet-links : Channel where Google Meet link is given for teams to join online meetings.

#meet-documentation : Channel where all the meetings record is kept and online meetings and physical meeting attendance is kept in sheets are recorded.

#to-do : Channel where all the daily tasks and deadlines are kept by the team leader.

#assessment-draft-submission : Channel where all the tasks draft are kept to be reviewed by team during meetings.

#task-final-submission : Channel where all the task files are kept which have been thoroughly checked and made final to be submitted in black board.

#Web-discussion : Channel where frontend materials and ideas are shared

#Database-discussion : Channel where database materials and ideas are shared

For Scheduled meetings and discussions, the team uses Google Meet. As it allows members to discuss the tasks, sharing ideas and making decisions easily.

Google Meet Link: https://meet.google.com/hif-ppyq-vrv

Project files and documents are shared using Google Drive, which helps the team to access the latest version of files and make editing easy. Additionally, GitHub is used for version control, allowing the team to manage changes in code, track updates and work effectively on development of the project.

B. Team Procedures:

1. Method for setting and following meeting agendas:

The Team Leader will come forward and set the agendas for the meetings. The team meetings may be conducted either physical or online depending on the situation. Regular team meetings will be scheduled to discuss project progress, fix issues and plan tasks. The team leader will notify and remind team members about the meeting through Discord channel (#meet-links). During the meeting, all the team members are responsible and accountable for following the agendas and contributing to the discussion.

2. Method of record keeping:

The Team Recorders will be responsible for recording meeting notes, important decisions and action items discussed during team meetings. The team leader will take responsibility and disseminate the task after the meeting. The agendas and actions will be stored in discord, where (#todo) channel is used by team leader to set the tasks and deadlines and (#assessment-draft-submission) used by each member to submit their drafts.

3. Procedures in the absence of a team member:

If a team member is unable to attend a meeting, they should notify the team leader as well as the team members in advance and they should also state proper reasons for their lack of presence. This helps the team to plan accordingly and avoid delays in project progress.

In a team of six members, meetings will still take place if at least four or more members are present. The members that were not able to attend the meeting should catch up on the meeting details by consulting the leader.

C. Team Participation:

6. Strategies to ensure cooperation and equal distribution of tasks:

To ensure cooperation and fair distribution of work, the team leader will divide the project into different tasks and responsibilities. Team members will then be able to choose according to their preferences, skills and the time needed to complete each task. This approach helps to make sure that the tasks are distributed fairly and that each member contributes to the project.

In cases where a team member experiences work overload, tasks can be redistributed among the team members so that the workload remains balanced. The team members are encouraged to share the workload with each other, support each other and communicate if they require assistance with their tasks.

If a team member does not contribute to their assigned task as well as in the team activities then they will receive a warning from the team. If the issue continues and the member receives three warnings, the member will have to pay a fine of two hundred .

7. Strategies for encouraging/including ideas from all team members *(team maintenance)*:

To ensure every member feels heard and valued, the team leader will first provide ideas for the work, giving the team a clear starting point. Benefiting the whole team as everyone will feel encouraged to share their own thoughts, suggestions and approach.

The team will always hear every member's idea without disregarding them. Members are allowed to build or improve ideas of each other, combine suggestions and propose new ideas. Once every idea is collected, the team will review all and the idea which receives the most support and vote is chosen as the final work of the idea.

8. Strategies for keeping on task *(task maintenance)*:

To ensure the team stays focused and on track throughout the project, the team leader will set clear and strict deadlines for each member's individual tasks in the to-do list. Those deadlines will be communicated early so that everyone knows exactly what task is allocated to them and when to complete, reducing the confusion and risk of members not taking part.

Regular Team meetings will be held to monitor progress, during these meetings each member will take turns sharing an update on where they are with their assigned task like what has been completed, what is still in progress and what still needs to be started. This keeps everyone accountable and gives the team a clear picture of how the project is moving.

The team meetings also work as an open space for all the members to share their tasks and if they have any confusion or difficulties regarding that particular task. Rather than struggling alone, members are encouraged to point out the issues they are facing so the team can work together to find solutions, as in giving clear instructions, redistributing workload or providing support.

D. Personal Accountability:

1. Expected individual attendance, punctuality, and participation at all team meetings:

All the team members are expected to participate in every team meeting on time and actively participate in discussions. Team members are expected to maintain punctuality, arriving to team meetings on time and completing tasks given on before the deadline.

Attendance will be monitored throughout the whole project timeline. If any member's attendance drops to 75% or below, a formal warning will be issued, making them aware that their attendance is insufficient and giving them a chance to improve.

If the attendance continues to drop and reaches below 55 % then the member will have to pay a fine of two hundred, and even after the fine if the member's attendance reaches below 40% and they refuse to cooperate then their team contract will be terminated.

2. Expected level of responsibility for fulfilling team assignments, timelines, and deadlines:

All the team members are expected to complete their assigned tasks responsibly and within the given deadlines. The #to-do channel in Discord will be used as the main reference for assignments, timelines and updates. Deadlines and task details will be posted daily so that each member is aware of their responsibilities. Every task will be assigned to a specific member, who will be given clear time frame to complete and submit their work

If a member is unable to complete their task on time or has partially completed the work, they must provide an update in the #assessment-draft-submission channel explaining the progress made and the reason for the delay. This helps the team to stay informed and allow others to assist.

The Final work submission is done in channel #task-final-submission where all team members are encouraged to submit all the final version of the tasks, which is ready to be submitted through the respective black board links.

However, if a team member does not complete any part of their assigned task, fails to contribute to the team, or does not communicate their situation, they will be given warning for the first 2 times, on third time, there will be a fine of one hundred , fourth will be three hundred and on fifth warning, their contract will be terminated.

3. Expected level of communication with other team members:

All team members are expected to maintain active and clear communication throughout the project to help in smooth cooperation and effective teamwork. Members should remain responsive every time as anyone in the group might need help and support from others at any time regardless of whether a meeting is scheduled or not. Any significant development, decision or updates related to the project must be shared openly with the entire team so that everyone stays equally informed. If a member is unable to attend the meeting or complete their task on a given day, they are expected to notify the group beforehand and with proper reasons so that the tasks can be reassigned and the team can continue making progress without any disturbance.

4. Expected level of commitment to team decisions and tasks.

All the team members are expected to show a high level of commitment to the decisions made by the team and the tasks assigned to them. Once a decision has been agreed upon through discussion or

voting, every member should respect the decision and work towards completing the team goals. Members should take responsibility for completing their assigned tasks on time and maintain a consistent effort throughout the project.

Team members should actively participate in discussions, meetings and task planning to ensure that everyone contributes to the progress of the project. If any member faces difficulties while completing their task, they should communicate with the team as soon as possible so that support or adjustments can be made.

E. Consequences of breach of contract:

What procedures and penalties do you wish to implement in the case of team members who deviate from your Team Contract? You will be asked to complete Peer Assessment to formally communicate effort expended by individuals, but what will you do as issues emerge?

Any violation of the team contract, including failing to meet responsibilities or not cooperating with the team, will not be tolerated. Team members are expected to meet deadlines set by the team leader and actively cooperate with the team. If a member fails to do so, they will first receive formal warnings, and if the issue continues despite multiple warnings, the member will have to pay a fine of two hundred and even after the issue persists the contract will be terminated .

All team members must maintain the confidentiality of team codes and resources. Sharing these materials with other teams is strictly prohibited, and any member found doing so may face serious consequences, including termination of their contract. Upholding trust in handling sensitive information is crucial for the smooth functioning and credibility of the team.

F. Certification by team members:

In appending your signatures below, you are stating that:

a) You participated in formulating the standards, roles, and procedures of this contract;

b) You have agreed to abide by these terms and conditions of this contract;

c) You understand that you will be subject to the consequences specified above and may be subject to reduction in overall grade in the event that you do not fulfill the terms of this contract.

Name	Anish Tandukar		
Signature		Date	16/03/2026
Name	Kanchana Pasachhe		
Signature		Date	16/03/2026
Name	Dipsan Thapa		
Signature	Dipsan Thapa	Date	16/03/2026
